## Professional Summary:

I am a skilled front-end developer with expertise in crafting immersive web experiences. Proficient in HTML, CSS, JavaScript, and React.js, I utilize tools like Sass, Bootstrap, Gulp.js, Pug, and Jest to bring concepts to life. With each project, I aim to create captivating narratives and push the boundaries of digital innovation.

---

- 

## Projects:

- **Dashboard** | [visit site](#) | 28 May 2023
  - This project is build only in HTML and CSS
  - Contains 8 pages
  - The responsive side was really easy thanks to grid system
- **Rock-Paper-Scissors Game** | [visit site](#) | 30 November 2023
  - I used HTML, SASS, JavaScript
  - This project really helped me improving my skill in sass I styled the shapes of the rock, paper and scissor with mixins which saved me a lot of time
  - The best part was making the computer choose for itself so u will never guess what it's the coming choice, to win this u must be lucky
  - I added some sound effect to make it more exciting
  - For the score I used the local storage to continue playing from your last score before leaving the game

- ***Fylo-landing-page* | [visit site](#) | 18 November 2023**
  - In this landing page I used HTML, SASS, JavaScript
  - For the framework I used bootstrap it saved me much of time to make the page responsive
- ***Newsletter sign-up* | [visit site](#) | 3 November 2023**
  - Coded using HTML, CSS and JavaScript for Desktop, Mobile
  - Validate the email field so the input email must be written in the correct way
- ***Bank-landing-page* | [visit site](#) | 10 December 2023**
  - HTML, SASS, JavaScript, Bootstrap
  - Responsive website
